Agency Information Collection Activities Up for Renewal

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) listed below is coming up for renewal. Before submitting the renewal package to the Office of Management and Budget (OMB), EPA is soliciting comments on specific aspects of the collection as described below.

DATES: Comments must be submitted on or before December 26, 1995.

ADDRESSES: U.S. EPA; Office of Wetlands, Oceans and Watersheds; Oceans and Coastal Protection Division (4504F); 401 M Street, SW; Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Virginia Fox-Norse; phone 202-260-1952; fax 202-260-9960.

SUPPLEMENTARY INFORMATION: *Affected entities:* Entities affected by this action are those municipalities which have applied for a renewal of a 301(h) waiver from secondary treatment requirements, or those with a pending 301(h) waiver application.

Title: Modification of Secondary Treatment Requirements for Dischargers to Marine Waters; ICR #0138.03; OMB control #2040-0088; expiration date: 12/31/95.

Abstract: The 301(h) program involves collecting information from two sources: (1) The municipal wastewater treatment facility, commonly called a publicly owned treatment works (POTW), and (2) the State in which the POTW is located. These sources are seeking a waiver from secondary treatment requirements under the Clean Water Act. Municipalities had the opportunity to apply for a waiver, but that opportunity closed in December, 1982. A POTW seeking to obtain a 301(h) waiver, or reapplying for a waiver, provides application, monitoring, and toxic control program information. The State provides State determination and State certification information. The requirements apply to those who applied to receive this benefit, i.e., a waiver from secondary treatment requirements. Regulations implementing Section 301(h) of the CWA are found at 40 CFR Part 125, Subpart G. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are displayed in 40 CFR Part 9.

There are 2 situations where information will be required under the 301(h) program:

Application Revision Information: Section 125.59(d) of 40 CFR allow a POTW to revise its application one time only, allowing a tentative decision by EPA to deny the waiver request. In its application revision, the POTW usually corrects deficiencies and changes proposed treatment levels as well as outfall and diffuser locations. The application revision is a voluntary submission for the applicant, and a letter of intent to revise must be submitted within 45 days of EPA's tentative decision (40 CFR 125.59(f)). EPA needs this information to evaluate revised applications and to determine whether the modified discharge will ensure receiving water quality, biological habitats, and beneficial uses of the receiving waters. Section 125.59(e) requires additional information to show compliance with applicable pretreatment requirements under § 125.65, and primary or equivalent treatment requirements under § 125.60.

Permit Reissuance Information: As the permits with 301(h) waivers reach their expiration dates, EPA must have

updated information on the discharge to determine whether the 301(h) criteria are still being met and whether the 301(h) variance should be reissued. Under 40 CFR 125.59(f), each 301(h) permittee is required to submit an application for a new section 301(h) modified permit within 180 days of the existing permit's expiration date; 40 CFR Part 125.59(c) lists the information required for a modified permit. Section 125.59(e) requires additional information to show compliance with applicable pretreatment requirements under § 125.65, and primary or equivalent treatment requirements under § 125.60. The information that EPA needs to determine whether the POTW's reapplication meets the section 301(h) criteria previously listed is outlined in the questionnaire attached to 40 CFR Part 125, Subpart G. The questionnaire is similar to the two used by POTWs for their original applications.

The EPA would like to solicit comments to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The burden estimate for the 73 regulated facilities totals 74,863 hours. This estimate includes the time needed to review instructions, search existing data sources, gather and maintain the data needed, and complete and review the collection of information.

Send comments regarding these matters, or any other aspect of the information collection, including suggestions for reducing the burden, to the address listed above.

Dated: September 29, 1995.

Robert H. Wayland III,

Director, Office of Wetlands, Oceans and Watersheds.
